

# Take a closer look.

Fingerprints of all qualities have met their match!

CSIpix has developed automated fingerprint analysis and identification software that is used by police worldwide in over 35 countries. Easy to learn! Designed with input from forensic experts from around the world

## CSIpix products:

### Comparator

- efficient side-by-side image comparison
- significantly reduces time needed to enhance, calibrate, and analyze fingerprints
- easy annotations and exhibit preparation

### Matcher

- performs in-depth, automated comparison between a latent and a tenprint card or known palmprint.
- contains all the functionality in Comparator

### Case AFIS

- install right on your computer, copy prints to a directory and search without the need for a database.
- contains all the functionality in Comparator and Matcher

### Scan & Submit

- digitally submit prints to RCMP CCRTIS (FBI and RCMP certified)

Save Time - Document - Share - Professional Court Charts
